They’re calling your company to get information they need about the products and services you offer. Then, because you’re busy, they get placed on hold. **Now what?**

It’s O.K. because your company uses the DPU-2000 System for on-hold marketing from Info-Chip Communications. The DPU-2000 System, with your custom message and music on-hold production playing, delivers the information that you want your callers to hear while they’re waiting to speak with you!

Information like:

- new products and services
- locations, directions, and hours
- helpful suggestions
- new website information
- and much, much more . . . (it’s like your very own personal radio station where you control the programming!)

What’s that??? You don’t have a DPU-2000 System working for you at your business? NO PROBLEM.

Simply contact DOSS Business Systems and get started right away with the award winning 100% digital DPU-2000 System for on hold marketing . . . from Info-Chip Communications.

Exclusive Features:

- Easy to install . . . just ‘plug in and play’
- 100% maintenance free . . . operates perfectly, even in the dirtiest and dustiest environment!
- Five year manufacturer’s warranty . . . the best in the business!
- Software controlled digital volume adjustments . . . no knobs to break or bend!
- Productions and volume control are non-volatile . . . no reloading or reprogramming if power goes out!
- No music licensing fees . . . ever!
- Complete with AC adapter and connecting cable included

Custom Production Included . . . *ask for details*
